VYAPAAR NETWORK

India's First Indenting Platform For Commodities (M2C)

INTRODUCTION

Vyapaar Network is first indenting online platform for commodities (Manufacturer to Consumer).

Under the leadership of Shri D.K. Jain ji with experience of 30years in steel industry , we have launched initially with category of Metals & Minerals and later have vision to enter other categories as well.

The aim of the platform is to give you 100% transparency in buying and selling of your products with ease of technology in single platform .

The platform has only manufacturers / shippers only which means there shall be no trader involved in between giving you, 100% clarity of business and best realization with wide range from Raw to Semi finish as of now have been integrated to select for our users to register themself as buyer / seller .

So as an industry you will get all products in single platform .

For shippers you shall get exposure to all manufacturers directly .

CEO Statement

With a vast experience in field of steel , textile , and other commodities in life , this has been my dream project integrating all my expertise of practical knowledge merged with latest technology in the form of this platform.

Hope this will help industry and create a new mark in the market making them ease of doing business on finger tip .

Hope to get co-operation & support from all of you.

Devendra Kumar Jain

Our USP'S

100% transparency

We believe in transparency, and our trading platform gives you just that

Genuine / Verified Profiles

Our thorough screening process gives you access to nothing but genuine verified profiles.

Direct interaction between Buyer and Seller

With easy to use website interface, you can directly get in touch with the buyers and sellers.

Reduce intermediaries

Save costs by ditching the intermediaries, and directly interacting with the buyer and seller.

User-friendly experience easy to operate

Flawless user experience and easy to operate interface means safe and hassle-free trade.

Multiple trading on a single platform

Trade with multiple buyers and sellers at the same time under one platform.

Features of App

Dashboard

- Analysis report on dashboard to help users to know the number of enquiry / offers with price and quantity to help them track further action.
- Price graph will help you to understand and track price mechanism product wise / origin wise in form of pie chart which will safeguard you from manipulated SMS services of mandi.
- Top Buyers / Sellers for products registered will be displayed on your dashboard making it ease for you to fetch fetch best price similarly Top 5 Enquiry / Offers are also displayed aiming the same.
- News section allows you to stay updated with latest news on steel market.
- Advertisement panels allows users to display their company name and logo and give exposure among all the industry leaders and corporates in our portal.

ENQUIRY / OFFER

- While adding any enquiry / offer users are also given option to highlight their enquiry / offer to a particular state / all states , particular port / icd also for international transactions .
- While adding any enquiry / offer user can select date and time for the validity of the same. Note : in between if user wants to deactivate any enquiry / offer the same is also provided.
- While adding any Enquiry / Offer user can also add images for their product , enter chemical & physical specs, payment terms and others terms if any.
- Segregations of MY OFFER , MY ENQUIRIES , OTHER USER OFFER, OTHER USER ENQUIRY will help users to bifurcate all enquiry and offers into above categories .

BIDS

- Once any bid is received against any enquiry / offer the same shall be transferred to Ongoing bid category. Against any offer / enquiry user can also bid as many times and conclude the deal by selecting Bid option or can accept if the same is ok.
- After the acceptance of bids the same is transferred to Completed Bid and the same is sent to admin for approval. If admin approved the bid the same is transferred under Accepted bid or if rejects the same is transferred under Rejected Bids.
- An automated mail is generated to both users that the bid has been approved by admin and a Bid ID is generated which shall be mentioned by buyer while raising any PO.

REPORTS

We have created few sections as follows:

- Sales order book Will show all sales made and user has to enter dispatch details against the orders confirmed in our platform. Purchase order book Will show all purchase made and user has to enter payment details against the orders confirmed in our platform.
- Top Buyers Will show you complete list of buyers on basis of quantity Top Sellers Will show you top list of sellers on basis of quantity
- Search Transporter Feature will enable users to search transporters listed in their area.
- Search Financer Will enable users to reach out listed financiers in case of any facility to be availed by them to execute any deals.
